

ENVIRONMENTAL POLICY

AJKCAS is the first eco-friendly college campus in Tamil Nadu. The institution has an environmental policy. The ECO Club organises programmes for environmental activities. It is a platform to nurture and educate students about value of the environment. It strives to improve environmental settings, offers programmes & activities to urge people to control pollution, plant trees and promote good environmental behaviour. Beautiful landscaping not only provides a pleasant learning environment to the students, but also captures the attention of the visitors to the campus.

Objectives:

- To create a healthy, ambient and green environment in the Campus.
- To create awareness on environmental issues and initiative among the student's community.
- To educate environmental sustainability development in the society.
- To encourage rural development initiative through extension activities.

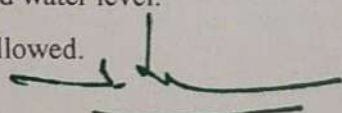

Initiatives take for Green environment:

- Every effort is taken to preserve carbon dioxide neutrality by planting trees on the campus. We plant different selects to sustain the Eco-friendly campus.
- Smoke emitting vehicles entry is highly restricted in the campus to avoid air pollution.
- Cleaning & weeding the campus and disposing the waste is done on day-to-day basis.
- Plant infections are regularly monitored and immediate corrective actions are taken.
- Various clubs conduct different programmes to create awareness about harmful effects of using the plastic in our regular life. Fixed boards in the campus as an awareness measure for insisting plastic free campus.
- NSS volunteers regularly do green activities in campus for maintaining a healthy and enjoyable environment.
- Gardeners are permanently available to water the plants using drip irrigation and sprinkler to save water. Bio fertilizer is used to fertilise the plants/trees.
- For maintain green and clean campus, the institution has restricted use of automobile in the college campus. Besides, it has separately allocated a space for Vehicle parking for both students and faculties. Bicycles are also used in the campus to make it pollution-free.
- The dried green waste is used in vermin compost as nutrient for better growth of the earthworm.
- Rainwater harvest is installed in the campus for improving the ground water level.
- Environmental guidelines given by the Governments are properly followed.
